

INFERNO

COMPOSITION:

Each Tablet Contains:

L-Arginine L-Aspartate.....	430mg
Taurine.....	50mg
Pycnogenol.....	20mg
Tribulus Terrestris Extract	100mg
Achillea Millefolium	75mg
Lepidium Meyenii	100mg

Product conforms to Natural Origin.

DESCRIPTION:

Inferno is a revolutionary formula that has been designed to help men enhance sexual pleasure and performance in an all-natural ways. It is a completely drug-free way to restore your confidence in bedroom by enhancing erection strength, libido, satisfaction and pleasure.

More than 10% men experience erection problems regularly. Inferno tablets offer a natural solution that can help these men achieve bigger, stronger and longer lasting erections painlessly. Thousands of men have already recaptured the sexual pleasure and passion.

MECHANISM OF ACTION:

1. Pycnogenol (standardized French maritime pine bark extract) activates endothelial nitric oxide synthase (eNO-S), the enzyme required to make nitric oxide. Nitric oxide (NO) relaxes the vessels that enable efficient blood flow — the key to healthy male sexual activity and overall vascular health. Pycnogenol further amplifies this relaxing effect by extending the amount of time nitric oxide remains in the bloodstream. Pycnogenol is also an effective antioxidant which prevents free radical damage to blood vessels including those of the penis.

2. L-Arginine is the biological precursor to nitric oxide synthesis in the endothelium. It interacts synergistically with Pycnogenol to sustain nitric oxide levels sufficient for healthy sexual function. L-arginine is involved in the formation of nitric oxide in the body. In a double-blind trial, men with erectile dysfunction were given 1,670 mg of L-arginine per day or a placebo for six weeks. L-Arginine supplementation was found to be particularly effective at improving erectile dysfunction in men with abnormal nitric oxide metabolism.

3. Tribulus terrestris in which protodioscin enhance the relaxant effect of penile tissues to increase the nitric oxide from the endothelium & nitrenergic nerve endings, which may claims its aphrodisiac activity.

4. Yarrow aerial parts (Achillea millefolium): Drying and moistening; promotes sweating and detoxification, but strengthens and tightens tissues. Stimulates uterus to bring on menstruation, yet curbs heavy menstrual flow; effectively aiding in regulation of menstrual flow. Relieves pelvic congestion. Works well for a boggy, weak uterus.

5. Maca (Lepidium meyenii): Helps to balance the hormones, but does not contain any hormones itself. It is able to do this by nourishing and balancing the endocrine system. Maca is a nourishing food for the endocrine system, aiding both the pituitary, adrenal, and thyroid glands (all involved in hormonal balance). Works to protect the body from stress damage. Shown to support and increase egg health. Shown to increase libido in both men and women.

AMINO ACID L-ARGININE IS REQUIRED FOR ENHANCING BLOOD FLOW

The key to unlock a constricted artery is a mediator called nitric oxide. Nitric oxide is generated from

INFERNO

L-arginine and supplementation with this amino acid is known to ease dilatation of arteries, enabling them to carry more blood volume. Pycnogenol works by accelerating the cellular machinery involved in converting L-arginine into nitric oxide. Inferno delivers abundant L-arginine as starting material in combination with Pycnogenol for accelerated processing of the amino acid into nitric oxide. This synergistic principal provides the basis for the ability of previously mal-responsive arteries to then deliver blood volume sufficient for a healthier erection.

INFERNO – A UNIQUE SYNERGISTIC RECIPE

Inferno is a proprietary blend of L-Arginine and Pycnogenol - French maritime pine bark extract. Together they increase nitric oxide production, stimulate circulation and blood flow and protect blood vessels from the damage that can occur from normal aging. This combination has a beautifully synergistic effect on blood flow into the vessel and enhances responsiveness, sexual stamina and enjoyment.

INFERNO HELPS IMPROVE SEXUAL PLEASURE AND STAMINA

A study in which all participants are unknowingly at one time receiving active treatment and at another time an inactive placebo and then cross-over following a discontinuation period, is regarded the gold standard in clinical research. Fifty men presenting moderate erectile problems related to unhealthy life-styles (overweight, mild hypertension) were investigated with Inferno or placebo in such cross-over fashion. Men were assigned to either group A or B.

During the first month group B got Inferno, while A received look-alike dummy tablets. Then both groups discontinued tablets for one month (washout period) and then switched to the opposite regimen.

While a group of men was taking Inferno for a month the erectile quality significantly increased, and when they discontinued the regimen for a month this effect largely faded. The study demonstrated increased stamina and sexual pleasure in men in response to Inferno. Men reported to lead researcher Romil Stanislavov MD that it was easier for them to initiate and sustain an erection.

INFERNO NOT ONLY HELPS YOU ACHIEVE AN ERECTION BUT CAN ALSO HELP COMBAT SPERM ABNORMALITIES

Clinical studies have found that Inferno is extremely beneficial for men suffering from mild to moderate sexual dysfunction and, better still, no serious side effects have been reported following its use. In study, Inferno was given to 50 men aged 45-plus who had erectile dysfunction and were also sub-fertile (namely they had sperm abnormalities such as low semen volume/sperm count and poor-quality sperm).

WHY DOES INFERNO HELP ON THE LONG RUN?

A study spanning an investigational period over half a year was carried out with 110 men with moderately impaired erectile function.

This study demonstrates that no habituation effects occur with Inferno and the benefits do not fade, but rather further improve during long-term supplementation for six months.

After this period, erectile function was even better than it already was after three months. This study identified improved sexual desire in response to Inferno as well as greater sexual and orgasmic satisfaction.

HOW SOON CAN I SEE THE RESULTS?

Unlike other natural impotence tablets, Inferno can provide both short-term and long-term results. You can enjoy the initial benefits of longer lasting erections just after a few weeks of taking 4 tablets every day. Results improve after you continue taking the tablets for months.

INDICATIONS:

Inferno is used to achieve:

- Enhance sexual pleasure and performance
- Improvement in sperm motility
- Improve sexual pleasure and stamina
- Increase blood flow to the genital areas &
- Indicated in erectile dysfunction & support and increase egg health helps to balance hormones.

DOSAGE AND ADMINISTRATION:

Take 2 tablets twice per day for 2 weeks and then 1 tablet twice per day thereafter.

CONTRAINDICATIONS:

Some people may experience headaches or flushing when they first begin taking Inferno but this should lessen with usage. People who suffer from herpes (cold sores or genital herpes) should not supplement with arginine because it stimulates the virus.

WARNINGS AND PRECAUTIONS:

Consult your healthcare practitioner prior to use. Individuals taking medicine should discuss potential interactions with their healthcare practitioner.

ADVERSE EFFECTS:

Inferno is a natural formula with no artificial ingredients or added drugs. No side-effects have been reported by any of users of this tablets, so you can take them without any concerns about the safety. However, if you are taking any prescription medications consult with your doctor before taking this tablet.

OVER DOSAGE:

Do not exceed the recommended amounts. Those on medication should seek professional advice prior to taking supplements.

INSTRUCTIONS:

Protect from light, excessive heat & moisture.
Store in a cool & dry place below 30°C.
Keep out of reach of children.

PRESENTATION:

Inferno Tablets are available in blister pack of 30's
